JOSEPH ARNOLD

Information Systems Scholar-Practitioner | Ph.D. Candidate | University Instructor

Ellijay, Georgia | 678-576-1621 | joseph@josepharnold.phd | josepharnold.phd

ACADEMIC PROFILE

Information Systems scholar-practitioner and Ph.D. candidate with an MBA and more than 30 years of Fortune 100 technology leadership experience at EY, IBM, and Intuit. Brings extensive applied knowledge of enterprise systems, digital transformation, infrastructure, technology governance, service management, organizational change, and emerging artificial intelligence. Teaching approach connects foundational Information Systems concepts to contemporary business practice through applied examples, active participation, historical context, and responsible preparation for AI-enabled work.

EDUCATION

Kennesaw State University | Ph.D., Business Administration - Information Systems — **Expected 2028**

Kennesaw State University | Master of Business Administration (MBA)

Kennesaw State University | Bachelor of Business Administration

TEACHING EXPERIENCE

Young Harris College | Adjunct Instructor of Computer Science — **Begins January 2028**

Incoming appointment

Anticipated teaching responsibilities

- Will teach assigned undergraduate Computer Science courses using lectures, demonstrations, guided practice, and applied problem-solving activities.
- Will prepare syllabi, lesson plans, instructional materials, and practical assignments aligned with departmental learning outcomes.
- Will develop and grade assignments, projects, quizzes, and examinations; provide timely feedback and maintain accurate academic records.
- Will hold office hours and provide individual guidance to support students' understanding of course concepts and technical skills.
- Will manage course resources, announcements, assessments, and grades through the college's learning management system.
- Will coordinate with departmental faculty on course expectations, student progress, and assessment while supporting academic integrity and approved accommodations.

Kennesaw State University | Graduate Teaching Assistant — **Fall 2026–Present**

IS 2200 – Information Systems

- Provide individual and small-group tutoring to reinforce Information Systems concepts, clarify assignments, and support students with varied levels of technical preparation.
- Grade assignments, quizzes, examinations, and projects using established rubrics; provide constructive feedback and maintain accurate grade records.
- Deliver lectures, lead discussions, and provide classroom coverage when required, in coordination with the supervising faculty member.
- Assist with course materials, applied assignments, assessments, and participation activities aligned with course learning objectives.
- Hold student support sessions and respond to course questions to help students strengthen technology literacy and business problem-solving skills.
- Support course administration through the learning management system, including instructional resources, announcements, attendance, and participation records.
- Coordinate with faculty on student progress, assessment consistency, academic integrity, and approved accommodations.
- Connect course concepts to enterprise networking, cloud services, cybersecurity, governance, and artificial intelligence through examples from professional practice.

COURSES PREPARED TO TEACH

- Introduction to Information Systems
- Management Information Systems
- IT Infrastructure and Enterprise Networking
- IT Strategy and Governance
- Digital Transformation
- Technology Project Management
- Artificial Intelligence in Business
- Cybersecurity Fundamentals

RESEARCH INTERESTS

Artificial Intelligence in Organizations • Agentic AI • Knowledge Hiding • Job Insecurity • Cognitive Load and Skill Development • AI-Enabled Upskilling and Deskilling • Technology Affordances and Constraints • Digital Transformation • Technology Governance • Enterprise Performance

RESEARCH IN PROGRESS

Agentic AI and Knowledge Hiding — **Dissertation research**

- Examines how agentic AI shapes employees' perceptions of work and employment.
- Investigates implications for knowledge hiding in organizations.

Artificial Intelligence, Cognitive Load, and Skill Development — **Conceptual development**

- Explores how AI use influences employee learning and skill development.
- Considers the role of cognitive effort in AI-supported work.

RESEARCH METHODS PREPARATION

Conceptual theory development • Deductive proposition development • Experimental research design • Survey measurement • Construct validity • Internal and external validity • Quantitative analysis • Causal reasoning

CONFERENCE AND SCHOLARLY ACTIVITY

Americas Conference on Information Systems (AMCIS) | Doctoral Consortium Participant, Reno, Nevada — **2026**

Information Systems Research | Peer Reviewer
Review academic manuscripts and provide structured feedback on theoretical framing, research design, clarity, and contribution.

SELECTED ACADEMIC AND PROFESSIONAL PORTFOLIO

- Academic website: josepharnold.phd - research, teaching, conference participation, curriculum materials, and professional background.
- Developed learning materials on scientific research, theory building, research validity, causal reasoning, the ladder of causation, and Information Systems research methods.
- Translate enterprise technology experience into classroom examples involving network infrastructure, cloud and digital workplace services, technology risk, governance, vendor management, and organizational transformation.

PROFESSIONAL EXPERIENCE

Ernst & Young (EY) | Associate Director | Global Infrastructure & Connectivity **2023-Present**

- Lead governance, modernization, and operational-improvement initiatives for global connectivity, digital workplace, telecommunications, asset lifecycle, and enterprise technology services supporting more than 400,000 employees across approximately 740 offices.
- Founded and lead the Asset Lifecycle Board, aligning Infrastructure, Procurement, Information Security, Product Management, and Asset Management around lifecycle risk, investment prioritization, and accountability.
- Develop executive dashboards, KPIs, forecasts, governance reviews, and operating models that improve service visibility, cost management, risk decisions, and delivery performance.
- Built the strategic case and stakeholder alignment for retiring the Riverbed platform, eliminating $1.3 million in annual operating expense.

IBM | Americas WAN Services Lead **2020-2023**

- Led WAN service delivery and transformation across the Americas, coordinating clients, engineering teams, service managers, carriers, and vendors.
- Managed service roadmaps, performance reviews, escalations, operational risk, vendor governance, and continuous improvement for complex enterprise connectivity environments.
- Translated business requirements into scalable network improvements that strengthened reliability, consistency, and customer experience.

Ernst & Young (EY) | Assistant Director | Global Network Services **2015-2020**

- Led the design, delivery, and continuous improvement of global network and connectivity services supporting international business operations.
- Translated business requirements into service roadmaps, architecture decisions, and enterprise implementations delivered across multiple countries.
- Coordinated engineering teams, vendors, and operational stakeholders to improve reliability, security, performance, and user experience.

Intuit | Senior Network Architect **1999-2015**

- Designed and implemented enterprise network architecture across offices, data centers, and technology environments supporting growth and customer-facing services.
- Led strategic infrastructure deployments and technical decisions through major changes in networking, mobility, data center technology, and enterprise connectivity.
- Partnered with business leaders, engineering teams, vendors, and technical stakeholders to improve performance, reliability, security, and scalability.

AREAS OF PRACTITIONER EXPERTISE

Enterprise Information Systems • Global Infrastructure Operations • Enterprise Networks • Digital Workplace • IT Service Management • Technology Governance • Operational Excellence • Digital Transformation • Vendor and Carrier Management • Asset Lifecycle Management • Technology Risk • Executive Communication

MILITARY SERVICE

United States Army | Veteran
