Financial Analysis | Strategy Development | High-performance Teams Building

I am a Product Strategist and current Doctoral student in Business with a focus on Information Systems, supporting large, complex organizations through financial analysis, strategic decision support, and vendor/contract management. I specialize in aligning technology and service investments with business goals, assessing risk and financial viability, and maximizing value from global providers. In my current role, I partner with senior leaders to guide portfolio decisions, improve operational efficiency, and enable data-driven, long-term business outcomes. At the same time, my doctoral work deepens my expertise at the intersection of business, technology, and organizational performance.

Key Strengths:

Financial Modeling | Data Analysis | Financial Risk Assessment | IS Researcher | Communication and Presentation | Team Management | Building Highly Functional Teams | Coaching |

Selected Highlights

- Partnered with senior leadership to establish an Asset Lifecycle Board to govern global asset performance, risk, and financial viability.
 - Developed internal functions to drive financial analysis, decision support, and contract/vendor management across the organization.
 - Implemented governance and reporting frameworks that increase transparency into asset spending, vendor performance, and portfolio risk for senior leadership.
-

Professional Experience

Associate Director, Ernst & Young | Secaucus, NJ | 01/2023 – Present

Global Business Manager and Operations Lead, July 1, 2025 – Present

- Responsible for the overall success of technology products, focusing on profitability and business value
- Develop and implement strategic product roadmaps aligned with technology demands
- Collaborate with cross-functional teams to drive product development and enhance user experience
- Establish the go-to-market, pricing and positioning strategies
- Position technology offerings as market leaders, contributing to sustainable growth

Product Strategist: January 01, 2023 – June 30, 2025

Led comprehensive contract review, adept financial report analysis, and pivotal global product management, driving a multimillion-dollar cost reduction, spearheading process enhancements, and innovating project evaluation methodologies for service enhancement and cost avoidance.

- Conduct comprehensive contract review and analysis, identifying optimal solutions for services or products.
- Proficiently generate and analyze financial reports to determine the most advantageous service or product options.
- Serve as a pivotal figure in global product management, ensuring streamlined operations and enhanced service delivery.

Key Achievements:

- Led an extensive analysis of a large global contract renewal, conducting detailed financial reviews resulting in savings exceeding \$5 million. Additionally, it achieved \$6 million in cost avoidance through further contract negotiations.
- Innovated and implemented project evaluation methodologies, enhancing service while achieving cost avoidance.
- Conducted comparative cost analysis on technology options for WIFI vendors, resulting in recommendations yielding an average of 35% savings compared to legacy deployment strategies.
- Evaluated a major project highlighting three financial cost impacts, showcasing over \$2 million in future value (FV) through hardware cost avoidance and a \$26 million cost reduction over five years due to critical executive-level decisions.

Americas WAN Services Lead, IBM | Sandy Spring, Ga |10/2020 – 01/2023

I am an accomplished team leader in WAN-edge technology management, strategic budgeting, and project planning. I have a proven track record of optimizing global operational efficiency and financial allocation and fostering cross-departmental collaboration through innovative technology models.

- Successfully managed a team of five engineers distributed across the US and Poland, overseeing all WAN edge technology, including SDWAN, Cisco, INET Switch, Nexus, and Riverbed Optimization.
- Strategize and allocate budgets and plan upcoming projects for the team and EY clients, focusing on next-wave technologies for the fiscal year.
- Guide projects and offer tier-four support to troubleshoot technology issues as necessary.

Key Achievements:

- Led and managed a high-level support system for over 100 offices within the Americas Regions, ensuring seamless operations and technology support.
- Reconstructed support teams in APAC and EMEA regions, expanding support to 600 offices and enhancing global operational efficiency.
- Effectively budgeted projects and operational costs for technology, optimizing resource allocation and financial efficiency.
- Conducted comprehensive inventory data analysis for client chargeback purposes, ensuring accuracy and transparency in financial transactions.
- Designed and implemented product-as-a-service technology models for internal chargeback systems between business units, streamlining financial processes and fostering cross-departmental collaboration.

Assistant Director, Ernst & Young | Secaucus, NJ | 06/2015 – 09/2020

Develop next-generation service and infrastructure technology projects for this global provider of optimization solutions, serving over 300,000 users across more than 130 countries. Develop roadmaps for transitioning infrastructure and cloud-centric deployments. Provide case studies to support funding of technology projects. Assume responsibility for governance, P&L planning, SLA development, security analysis, and vulnerability testing. Develop an operational and investment strategy for a \$5 million annual budget. Functioned as technical design lead on all aspects of global service development related to WAN edge technology.

- Lead a global, cross-functional team; mentor and guide members inside and outside the team structure while leveraging leadership training to build high-performing, culturally aware teams.
- Designed and implemented a process for onboarding a large global client contract, enabling smooth employee migration and assimilation during transition.

Senior Network Architect, Intuit | Westlake Village, CA 06/1999 – 06/2015

As a Senior Network Engineer with 15 years of experience at Intuit, I have been instrumental in driving the design, implementation, and optimization of complex, large-scale network solutions globally. My role involves leading the evaluation, proof-of-concept (POC), and deployment of cutting-edge network technologies, ensuring seamless integration

and performance across multiple geographies. I possess deep expertise in network architecture, design, and troubleshooting, with a proven track record of enhancing network reliability, scalability, and security.

Key Responsibilities:

- Lead the design and implementation of large-scale network infrastructures to support global business operations.
- Conduct comprehensive reviews and POCs to assess the viability and performance of emerging network technologies.
- Collaborate with cross-functional teams to ensure seamless network solutions integration with existing IT environments.
- Oversee the deployment and configuration of network equipment, ensuring adherence to industry best practices and security standards.
- Monitor network performance, identifying and resolving potential issues before they impact business operations.
- Provide technical leadership and mentorship to junior engineers, fostering a culture of continuous improvement and innovation.
- Work closely with vendors and service providers to negotiate contracts and manage relationships, ensuring cost-effective and high-quality services.
- Develop and maintain comprehensive network documentation, including design specifications, configuration guides, and operational procedures.

Key Achievements:

- Successfully led the global deployment of a new network architecture that improved scalability and reduced downtime by 30%.
- Spearheaded the implementation of a cutting-edge SD-WAN solution, resulting in a 25% reduction in network latency across international sites.
- Directed a multi-year project to migrate legacy network infrastructure to a cloud-based environment, enhancing security and reducing operational costs by 20%.
- Established a robust network monitoring and alerting system, leading to a 40% improvement in issue resolution times.

Earlier Roles Include: US Army – National Guard & Inactive Ready Reserves

Education, Certification & Professional Development

Education - Bachelor of Science in Sociology – Kennesaw State University (Magna Cum Laude) (2019)

Master of Business Administration – Kennesaw State University 2023

Doctoral Student of Philosophy, PHD in Business Administration

Certification –ITIL Certified

Industry Training – Leadership Training | Teaching with Charisma Training

Board Involvement

Member – Residential HOA (2008-2018) | Director of Membership – AFCOM (2008) | Secretary – Smart Growth Gwinnett (2007) TAG Member (2023)
