

JOSEPH ARNOLD

Enterprise Technology & Business Transformation Executive

Building governance, improving operational performance, and aligning technology organizations with business strategy.

Ellijay, GA | 678-576-1621 | joseph@josepharnold.phd | josepharnold.phd

EXECUTIVE PROFILE

Enterprise technology executive with more than 30 years of Fortune 100 leadership experience transforming global technology organizations through governance, operational excellence, financial stewardship, and enterprise modernization. Recognized for improving organizational performance by aligning technology strategy with business priorities, strengthening operating models, and leading cross-functional transformation initiatives. Supported enterprise technology services for more than 400,000 employees across approximately 740 global offices while delivering measurable cost optimization, executive visibility, and operational improvements. Doctoral researcher in Information Systems focused on artificial intelligence, organizational capability, and the future of knowledge work.

EXECUTIVE HIGHLIGHTS

- Reduced annual operational spend by \$1.3 million through strategic analysis and enterprise divestment of the Riverbed platform.
- Founded the Asset Lifecycle Board, establishing enterprise governance across Infrastructure, Procurement, Information Security, Product Management, and Asset Management.
- Supported enterprise technology services for more than 400,000 employees across approximately 740 global offices.
- Directed cross-functional operational reviews identifying governance improvements, organizational efficiencies, and operating model enhancements.
- Led modernization initiatives spanning Office Connect, enterprise Wi-Fi, Network Access Control (Zero Trust), telecommunications, and enterprise connectivity.
- Developed executive dashboards, KPIs, governance reporting, and forecasting to strengthen technology business management and executive decision-making.
