Education

PhD **Kennesaw State University**, Business Administration, Information Systems 2024 – present

MBA **Kennesaw State University**, Business Administration 2021 – 2023

Teaching

Graduate Teaching Assistant — Kennesaw State University: Fall 2026–Present. IS 2200 — Introduction to Information Systems. Provide individual and small-group tutoring; grade assignments, quizzes, examinations, and projects; and provide constructive feedback. Deliver lectures, lead discussions, and teach when required. Assist with course materials, student support sessions, attendance, and learning management activities. Coordinate with faculty on student progress, academic integrity, and approved accommodations.

Adjunct Instructor of Computer Science — Young Harris College: Incoming appointment beginning January 2028. Anticipated responsibilities include teaching undergraduate Computer Science courses; preparing syllabi, instructional materials, and applied assignments; developing and grading assessments; and providing timely feedback. Will hold office hours, support student learning, manage course resources and grades, and coordinate with departmental faculty.

Research Interests

Artificial Intelligence in Organizations: Examining how emerging technologies influence employee behavior, decision-making, and organizational outcomes.

Information Systems Strategy: Investigating the strategic use of information technologies to support organizational performance and innovation.

Technology-Enabled Work Processes: Exploring how digital technologies reshape work practices, collaboration, and productivity.

Organizational Knowledge and Collaboration: Studying knowledge-related behaviors and mechanisms that support effective information sharing and learning.

Digital Transformation and Innovation: Understanding the organizational challenges and opportunities associated with technological change.

Research in Progress

Agentic AI and Knowledge Hiding: Dissertation research examining how agentic AI shapes employees' perceptions of work and employment, with implications for knowledge hiding in organizations.

Artificial Intelligence, Cognitive Load, and Skill Development: Conceptual research exploring how AI use influences employee learning and skill development, including the role of cognitive effort in AI-supported work.

Conference Presentations

AMCIS 2026: ERF paper presentation, Reno, Nevada.

Professional Service

Journal Reviewer: International Journal of Information Management (IJIM), 2026–Present

Conference Reviewer: Americas Conference on Information Systems (AMCIS), 2026

Experience

Ernst & Young, Global IT Leader — 2015 – present (11 years)

- Translated product usage and operational data into actionable insights, driving decisions that improved product performance and adoption
- Identified revenue leakage and inefficiencies through deep data analysis, contributing to cost optimization and margin improvement

nFront/Digital Insight/Intuit, Senior Network Engineer — 1999 – 2015 (16 years)

- Global Network Architect for office designs, core network infrastructure, and innovation
